1. The response to the restriction requirements filed on August 26, 2005 has been entered. Accordingly, claims 1-4 have been elected for further examination, and claims 5 and 6 have been withdrawn from further examination.

2. On September 14, 2005, a telephone conversation was held between the examiner and the applicant pro se, Mr. James M. Stoddard. The examiner needed rephrasing of a few limitations included in the independent Claim 1 for definite recitation.

Based on the above-indicated discussion, Mr. Stoddard authorized an examiner's amendment authorizing rephrasing of the limitations in Claim 1 as detailed in section 3 of this office action.

A copy of the interview summary is attached herewith.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with the inventor pro se Mr. James M. Stoddard on September 14, 2005.

- Claim 1, line 13, replace "may be inserted and" with -- is insertable in said adapter body to--;

- Claim 1, lines 17 and 18, replace "may be inserted an electrical receptacle" with --said electrical plug is insertable in said an electrical receptacle to electrically communicate with said electrical receptacle--;
- Claim 1, lines 21 and 22, replace "an electrical plug may be inserted and" with --said electrical plug is insertable in said adapter body to--;
- Claim 1, line 26, "may be inserted into an electrical receptacle," with -- is insertable in said electrical receptacle to electrically communicate with said electrical receptacle--;
- Claim 1, line 33, add -- plug--after "cord"; and
- Cancel claims 5 and 6.

Allowable Subject Matter

4. Claims 1-4 are allowed.

The prior art of record, including Major (US Patent No.: US 6,290,533 B1), does not show or suggest the applicant's invention as claimed. Specifically, the prior art of record does not disclose an illuminated electrical adapter device combining:

- an illuminating module including a light-emitting diode (LED), a battery and means to control electrical power - a switch -; and the illuminating module removably attachable to an adapter body which is insertable in an electrical receptacle as recited in Claim 1.

The above-indicated combination of the features, a battery-powered illuminating module removably attachable to an adapter body, which is insertable in an electrical receptacle, makes this invention unique.

Major ('533 B1) discloses a flashlight plug including an electrical power plug including a battery-powered light source positioned within the housing of the electrical power-plug. Although, the light source illuminates an electrical receptacle, the battery-powered light source is not disposed in an adapter connected to a power plug. Further, the battery-powered light source assembly is not an independent body removably attachable to the adapter body. Thus, Major ('533 B1) does not meet the limitations of the independent Claim 1.

Therefore, Claim 1 is allowed over prior art.

Claims 2-4 are necessarily allowed because of their dependency on the allowable base Claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

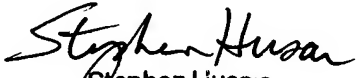

Wright (US Patent No.: 5,007,857) and Tong (U.S. Patent No.: 4,350,407)
